Price: **100.00 ?**

Drainage Cell: What is Its Actual Use and Purpose? Best Quality and Easy Use, Applications, and Bene: Drainage cells, also known as drainage mats or geocells, are lightweight, interlocking units made from durable plastic materials. These cells form a honeycomb structure that allows water to flow freely through the channels while holding the surrounding soil in place. Typically, drainage cells are designed to be laid on the ground and covered with soil or other materials, providing excellent water retention and drainage systems Drainage cell mat. The construction of drainage cells ensures that excess water doesn't pool on surfaces, helping to manage stormwater effectively and prevent flooding.
